

'Start-Up Superstars' (SSS)

offers students a unique opportunity to explore the world of entrepreneurship, encouraging them to develop and pitch business ideas, manage enterprises, and partake in real-world trading at school events. This programme equips young minds with essential business skills, from drafting a business plan to managing finances, all whilst promoting the values of sustainability and social responsibility. Seed funding provided by the school enables these student-led ventures to thrive, with profits supporting charitable causes and rewarding the young entrepreneurs. An awards ceremony honours their achievements, highlighting the journey from concept to commerce. SSS transcends traditional business education, focusing on building a better future through innovation, teamwork, and community impact.
